1 Center
Unlimited Users

Infoskool C
480€/year
Unlimited Centers
500 Users

Infoskool D
750€/year
Unlimited Centers
1500 Users

CUSTOMIZATION

Optional service for the adjustment of fields in student reports, grade reports, etc. or even in colours and logos of the educational organization. Those who don't choose it, get the application without being able to change the above data.

NOTE THAT:

The term users refers to the personal passwords of students/parents (one password) and to the teachers that an educational organization needs. In every package are provided two administrator passwords for the secretariat or the owner of the organization. You can at any time change package according to your needs.

The characteristics of Infoskool are the same in every package, with the only differentiation made in the number of allowed centers and users. Since there will be different needs than those that the packages can cover, a personalized package can be created especially for you. There are no extra charges for hosting and support of the application or other hidden costs.

Access to the application is made with the use of a link to an existing website or it is used by itself even if there is no website.
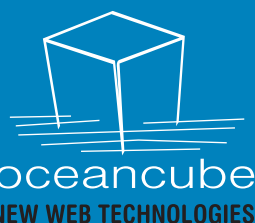

*VAT 24% are not included.

WHAT'S NEXT...

We are already working hard for the Infoskool v4.0 version which will be released in a short time and will contain the following additional features:

- Improved graphics for better browsing experience.
- Ability to connect with e-learning application (Moodle, Open eClass).
- Improved statistics and informative data.

All our customers will get the new version without extra cost, when it is completed.

GOOD EXPLOITATION OF TECHNOLOGY

Incorporate a modern educational environment
to your teaching.
